PERFIL

Professional awaiting degree conferral, holding a Technology Degree in Software Development and Analysis, with more than five years of experience in web development, specializing in front-end development and Drupal. I have extensive knowledge of project management tools and software version control systems. I also have experience in visual design, using a variety of design tools with a strong focus on user experience (UX).

I am skilled at developing logical and innovative solutions to complex problems, driven by my continuous interest in technology. I adapt quickly to the requirements of each project and integrate effectively into multidisciplinary teams, contributing commitment, responsibility, and a collaborative attitude to achieve established goals.

As a professional committed to continuous growth, I consistently evaluate and improve both my technical expertise and personal skills, striving to deliver high-quality results and create value in every project I undertake.
